

TC1000

All Weather Ventilator and Whole House Cooler

Tamarack Technologies, Inc.

The **TC1000** is the only ventilating fan designed and assembled in the USA for use in both sunroom and solid wall/roof applications. It is quiet, energy efficient and has a motorized, insulated damper that closes when the fan is not in use preventing cold air, insects, rain and snow from entering your home or sunspace. The remarkably versatile **TC1000** fits into the roof glazing system of most sunspace manufacturers and is perfect for flat roof, solid roof and sidewall applications for whole house cooling where interior attic installation is not possible.

Thousands of **TC1000's** have been installed in sunspaces and homes, providing excellent ventilation and increased enjoyment of a sunrooms, patio rooms and homes nation wide. Extremely energy efficient, the **TC1000** uses only 50 watts at low speed (less power than a 60 watt light bulb) and only 100 watts when running at high speed. The **TC1000** has been designed and tested to Underwriter Laboratories standards and proudly carries the UL label. The system is completely maintenance free and carries a three year warranty.

- Quiet
- Energy Efficient
- Easy Installation
- No Maintenance
- UL Listed
- Positive Insulating Seal
- Three Year Limited Warranty
- Assembled in the USA
