14 x 8	146 CFM

RAPs: Return Air Pathways

PROBLEM: HVAC systems are often unable to keep the conditioned air balanced throughout a home or office. This can lead to hot and cold areas when doors are closed.

SOLUTION: Return Air Pathways allow air to flow from room to room even with the doors closed, keeping the overall system in balance and occupants comfortable.

Save money on your heating and AC costs while creating a more healthy and comfortable environment.

The RAPs are The Air Balance Solution for:

- Laundry rooms and mechanical rooms.
- Home offices and bedrooms.
- Conference rooms in commercial buildings.
- Any space that does not have both a supply and return for the conditioned air.

Allow the air to flow and feel the difference.

- Improves heating and AC system performance.
- Finish grilles included – off-white.
- Internal noise and light absorbing baffle included.
- Easy to install.
- One piece frame for new construction, two piece frame for retro-fit.
- Fits within standard framing.
- Various sizes available.
- Special contractor bulk pricing available.
