14 x 6	122 CFM
14 x 8	160 CFM

RAPs: Return Air Pathways

PROBLEM: HVAC systems are rarely able to keep the conditioned air – both heat and cool – balanced throughout a home or office.

SOLUTION: The RAPs allow air to flow from room to room even with the doors closed, keeping the overall system in balance and the occupants comfortable. RAPs help to eliminate hot and cold spots when doors are closed.

Save money on your heating and AC costs while creating a more healthy, comfortable and energy efficient environment.

The RAPs are The Air Balance Solution for:

- Laundry rooms and Mechanical Rooms
- Home Offices and Bedrooms
- Conference rooms in commercial buildings.
- Any space that does not have both a supply and return for the conditioned air.

Allow the air to flow and feel the difference.

- Improves heating and AC system performance.
- Finish grilles included – off-white.
- Internal noise and light absorbing baffle included.
- One piece frame for new construction, two piece frame for retro-fit.
- Fits within standard framing.
- Special contractor bulk pricing available.
- Air flow testing was performed by Texas A&M. Test reports are available on our site.
